## COVID-19 Booster Dose Recommendations

As of November 30, 2021 in Washington, 26,548 COVID-19 cases and 3,167 deaths (34 percent of total deaths) are associated with a long-term care facility.

Booster doses of all three COVID-19 vaccine types are now available for everyone 18 and older.

- Everyone 18 and older should get a booster shot at least six months after receiving both doses of the Pfizer-BioNTech or Moderna COVID-19 vaccine.
- Everyone 18 and older who received the single-dose Johnson & Johnson vaccine should get a booster shot two months after getting vaccinated.

## How to Access Support for Booster Doses

Resources are available to help ensure vaccinations can be done at your facility. Consider the following for planning and accessing COVID-19 vaccines:

1. Contact your long-term care pharmacy for on-site support.
2. Contact your local health jurisdiction (LHJ) to find out if they are already working with local partners for on-site vaccinations. Find your LHJ here: [www.doh.wa.gov/AboutUs/PublicHealthSystem/LocalHealthJurisdictions](http://www.doh.wa.gov/AboutUs/PublicHealthSystem/LocalHealthJurisdictions)
3. If you're not sure about resources and do not currently have a plan for ongoing vaccinations, please take this short survey to let us know: <https://www.surveymonkey.com/r/DQ5K9WV>
4. Contact the Department of Health by email at [COVID.Vaccine@doh.wa.gov](mailto:COVID.Vaccine@doh.wa.gov) for other questions.
